

**REFERENCE LETTER**

23 Jan 2015

To whom it may concern

As the EVP and CVP of Garanti Bank, we are writing to you in support of Çelik Köseoğlu and his skills on computer software development.

Çelik has been an intern in Garanti Bank Software Development for the last 2 weeks and he has shown a great success. He has developed an application called SteeLog which was requested by our Mobile Payment Software development team. It displays and reads logs in real-time, which saves time for our developers while fixing errors and testing new software. The software has many other features in the documentation which he wrote. You'll find the documentation attached to this document.

Best regards,

Reha Emekli  
EVP of Garanti Bank

Nazmi Şener  
CVP of Garanti Bank
