

11 Aug 2015

To whom it may concern,

We are writing this letter to recommend Çelik Köseoğlu for internship/employment at your company. From July through 14th of August, Çelik was an intern at our corporation, Oracle in the Business Intelligence Department. We have been his direct supervisors during this time.

Çelik primarily assisted us with Big Data technologies. In our project, we wanted him to analyze a stream of log files in real time and he provided us a solution by using

- Hadoop for setting up the HDFS environment
- Flume for reading logs and importing them to HDFS
- Hive for analyzing the imported files

Also, he has written a full documentation for his work, enabling further development.

He showed good knowledge of programming terms and languages and was eager and quick to learn when he came across obstacles. He was focused throughout the process and was able to handle new Big Data technologies. He integrated quickly into our team and gained everyone's trust and respect by constantly delivering quality results.

Based on his performance at Oracle, we have no hesitations in recommending him for internship/employment at your company.

Sincerely yours,

Tolga Yıldırım
